INTRODUCING THE NEXT ERA IN MULCHING

Cutting-edge, intelligent control technology makes use of mulcher operational data to provide you with industry-changing productivity and profitability. Forget pushing buttons, Fusion automatically tunes the attachment to your carrier in real time. This maximizes your machine performance and lifespan while minimizing downtime. The technology is weather-sealed and built with Fecon's uncompromising standards for durability, ready to deliver the best performance no matter the conditions.

CONNECTIVITY AND SIMPLICITY IN ONE SIMPLE PACKAGE

- ✓ Scans for power and flow before initiating a learn sequence
- ✓ Monitors machine parameters to develop power curves and establish set points
- ✓ Measures maximum and minimum displacement, rotor RPM and system pressure for optimal performance
- ✓ Eliminates manual setup and tuning through a truly Plug n' Play design

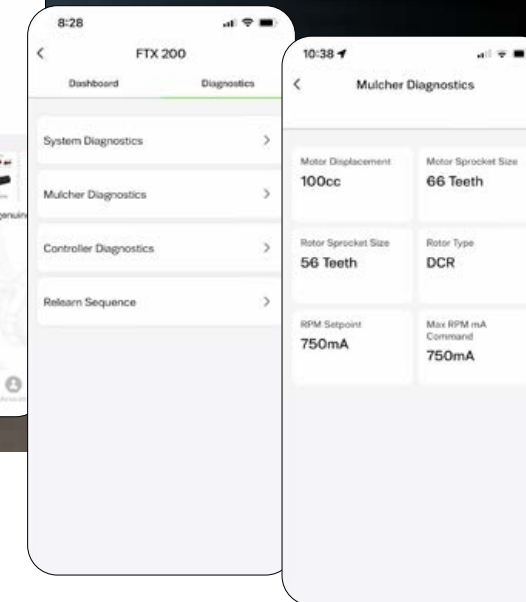

COMPONENTS

Electronic Displacement Controlled Hydraulic Motor
Integrated Speed and Temp sensors
On-Board Technology Controller
Telematics Modem
LED Diagnostic Indicator
Shock Mounted Panel
Web-based Portal for Customer Feedback

REAL-TIME
PERFORMANCE DASHBOARDS

OPERATING MODE
SELECTION

Continuous calibration based on temperature, carrier efficiency and carrier settings

Identify machine location and potential issues in operation

Maximize staying power, minimize recovery time

Eliminate manual setup and tuning

STAY UP TO DATE WITH THE FUSION APP

Seamlessly integrate the new Fusion app into your day-to-day mulching operations. Gain advanced telematics and performance tracking, select operating modes, and discover deep insights into your machine. Plus, up-to-date programming ensures your mulcher remains current with the latest advancements in technology.
